EDUCATIONAL BREAKOUT SESSION 1

10:15 am - 11:00 am **UPK Oracle User Productivity Kit (UPK) - Work Smarter not Harder:** Oracle

Oracle User Productivity Kit (UPK) gives you the tools to educate project team & end users on implementing, maintaining and using not only Oracle applications but other solutions across your enterprise. Create system transaction docs, user acceptance test scripts, post go-live support, & web-based training that visually captures & simulates the exact steps a user should follow within an application for improved competency & productivity. UPK helps ease change management, accelerate end user adoption & reduce implementation times, resulting in a faster return on investment..

Making the move - Migrating to EnterpriseOne from World A73 on budget, on time, on target

Jim Oldham, Corning Data Services

While everyone else is picking up the pieces, will you have already made your move? How one customer gained competitive advantages by migrating from World A73 to EnterpriseOne. and they saved money in the process.

Objectives - Discuss why this customer made the decision to make the move from World to E1 now; Demonstrate how they are using their upgrade as a competitive advantage; Show how the customer saved money in the process

Paperless Processing at Sperian Protection: Using JDE to Reduce Costs and Streamline Workflow Quadrant Software

This presentation shows how Sperian Protection, the leader in Personal Protection Equipment, leveraged their JDE application using Paperless Process Management to streamline their Order Processing and Accounts Payable processes and improve efficiency.

Objectives:

- Understand how to leverage your current IT infrastructure and tie your core JDE solution with paperless processing
- Identify the 5 key characteristics of a good plan for implementing a paperless solution
- Be aware of the pitfalls that usually arise during implementation and know how to address them
